Every rider and driver is now required to follow these rules in order to use Lyft:

- **Stay home if you have COVID-19**
  If you feel sick, staying home is the best way to help contain it and protect others.

- **Wear a face covering**
  To help slow the spread of the virus, riders and drivers must put a face covering on before they get in the car, and wear it for the whole ride.

- **Keep the car — and hands — clean**
  Riders and drivers should take care to sanitize their hands before riding. And riders are not to leave any trash behind.

- **Sit in the back seat**
  Out of respect for drivers, riders are asked to put some protective distance between themselves and the driver’s seat.

- **Keep the car windows open**
  When possible, riders and drivers should help increase air circulation in the car.

**Please note:** Anyone who does not agree to these rules will be unable to ride or drive with Lyft.

Thanks, as always, for your help in building a welcoming community for Lyft’s riders and drivers.
